

Solar Energy

Solar Energy, the official journal of the International Solar Energy Society®, is devoted exclusively to the science and technology of **solar energy applications**.

The Society was founded in 1954 and is now incorporated as a non-profit educational and scientific institution. With participation encompassing 100 countries, ISES® serves as a centre for information on research and development in **solar energy utilisation**. Through its publications and its sponsorship of technical conferences, the Society provides a world forum for the active consideration of **solar energy**.

Solar Energy welcomes manuscripts presenting information not previously published in journals on any aspect of solar energy **research, development, application, measurement or policy**. The term 'solar energy' in this context includes the indirect uses such as wind energy and biomass. Because of the international character of *Solar Energy*, articles that deal solely with the solar radiation or wind data base of a specific country are not normally considered suitable for *Solar Energy*. Submitted manuscripts may take the form of reports of original studies or reviews of significant prior work in a given area. All manuscripts are subject to reviews to assure accuracy, clarity, and long-term value.
